

DIXIE STATE COLLEGE

Secondary Student Teaching Evaluation

Midterm () Final ()

(Reflection evaluation)

Student Teacher:

April Anderson

Mentor Teacher:

- none -

College Supervisor:

Dale Barlow

School:

Fossil Ridge Intermediate

Grade Level:

7th Grade Science

Date:

April 14, 2013

(lesson given on April 11, 2013)

Instructions for completion of the Student Teaching Report:

This is the final student teaching evaluation report and will be retained on file at DSC. It is important for administrators and human resource personnel at school districts to have both numeric and written data to be able to assess the skills of the student teacher. Therefore, it is necessary to complete all portions of this report as completely as possible.

The following evaluation outlines categories synonymous with the Dixie State College Education Department DESERT Model principles that embody national and state standards (i.e., INTASC, TEAC, Utah Effective Teaching Standards), which demonstrate competency to prospective employers. Remember that your evaluation is for a beginning teacher, one who is likely to start teaching the next school year. The evaluation includes the following two parts:

1. After reading the descriptions of the performance levels in each category, rate the teacher candidate's performance on the 1-4 scale described below and check the corresponding box. See Student Teaching Evaluation Rubric on page 2.
2. After each scoring guide, write a narrative description of the student teacher's demonstration of each respective category. These comments should reflect activities, projects, or strategies the student teacher has planned and/or implemented in the classroom. Such comments serve as **evidence** the student teacher produced or demonstrated the performance level described in each major area associated with teaching.

Revised: November 2012
